Part B. CV SUMMARY (max. 5000 characters, including spaces)

I have a **PhD in Archaeology** (University of Córdoba – UCO, Spain) with my dissertation *The mosques of Islamic Córdoba: concept, typology and urban function*. I am currently a **postdoctoral fellow at the UCO Archaeology Area** in the frame of Plan Andaluz de Investigación, Desarrollo e Innovación. I belong to the **Sísifo Archaeology Research Group** (UCO) and to the Kolleg-Forschungsgruppe (KFG) **Religion and Urbanity: Reciprocal Formations** (University of Erfurt, Germany). Previously, I was a

MSCA-COFUND fellow at the Max-Weber-Kolleg of the University of Erfurt (Germany) and a DAAD postdoctoral granted at the University of Bamberg (Germany).

I am an **international recognised expert on Islamic religious spaces** in the Middle Ages with particular attention to al-Andalus and the Umayyad period. I determine how **mosques**, influenced and actively participated in the **shaping and evolution of cities**, with strong political and social motivations beyond religious functions. I prioritised **urbanistic and diachronic cross-cutting viewpoints** to apprehend the **dynamics of formation and growth** of urban spaces implementing **multidisciplinary and innovative methodologies**. My work clarifies **transfers** of architectural and behavioural models and the **official role** of mosques in the design of Islamic capitals. My results are being communicated in international conferences, often as **invited lecturer**, and through more than 20 national and international **publications**, many of which result from international cooperation thanks to my **experience abroad**, and from **cooperation with the private sector**. This includes my participation in **national and international I+D+i research projects**, as well as transfer of technology activities. Proof of the relevance of the topic and the impact of my research are **increasing number of citations received** and the **Leocadio Martín Mingorance Award** (UCO, 2020) to my research paper “The role and meaning of religious architecture in the Umayyad state: secondary mosques” (2018).

I have taught **specialized seminars and courses in international Universities** (such as the Sao Paulo University, Brazil, in March 2014; University of Bamberg, Germany, April 2018; Ca Foscari University of Venice, Italy, March 2019; University of Istanbul, Turkey, March 2019; American University in Cairo, Egypt, February-March 2020, University of Erfurt, 2020 and 2021; RomanIslam Center at the University of Hamburg, Germany, January 2022). I am a member of the **scientific committee of the Ernst-Herzfeld-Gesellschaft** Research Award. The research maturity of my work and career are also evident in my participation in projects and organization of events for **scientific dissemination and transfer of knowledge**, my engagement in different and varied **publications of an educational nature**, and in my collaboration with the **private sector and different mass media** for the dissemination of knowledge and production of audio-visual material on al-Andalus and Islamic Cordoba.
