General quality indicators of scientific research

This section describes briefly the main quality indicators of scientific production (periods of research activity, experience in supervising doctoral theses, total citations, articles in journals of the first quartile, H index...). It also includes other important aspects or peculiarities.

Joan Negre is a Research Associate at the Catalan Institute of Classical Archaeology based in Tarragona, and a member of the Laboratory of Archaeology and Architecture of the City. He is also the director of the Gandia Museum of Archaeology and Head of Gandia City Council's Archaeology and Heritage Service. He earned his PhD in 2013 at the Autonomous University of Barcelona, where he defended his doctoral thesis: an exhaustive historical and archaeological study of the Andalusi period in the region of Tortosa. He held various teaching positions at the university in the Department of Antiquity and Middle Ages Sciences, before moving to the Austral Centre for Scientific Research at the National Scientific and Technical Research Council in Argentina, where he was awarded two consecutive postdoctoral fellowships. His research focuses on two principal areas: the archaeology and history of the medieval Islamic world, and the spatial analysis of historical phenomena. He studies socioenvironmental dialectics by investigating human occupation strategies and their spatial signatures, a line of work consolidated through several long-term research residencies at the Università degli Studi di Siena in Italy.

He participated in 16 competitive projects, both national and internationally funded. His scientific production includes 5 books, 22 papers in highly-ranked journals and another 6 texts in indexed publications. Also, he published 20 book chapters in prestigious international publishing houses, such as CRC Press and British Archaeological Reports, as well as an entry in the Encyclopedia of Archaeological Sciences from Wiley-Blackwell. He presented 26 papers in national and international relevant conferences, hosted by several international associations, such as the Computer Applications in Archaeology, the European Association of Archaeologists, the Society for American Archaeology or the Association Internationale pour l'Étude des Céramiques Médiévales et Modernes en Méditerranée. Finally, he debated his work as invited speaker by the Maison Méditerranéenne des Sciences de l'Homme, the Deutsche Archäologische Institut, the Einstein Stiftung Berlin and the RomanIslam Center for Comparative Empire and Transcultural Studies.
